

Hilda Iita Presentation Report

Hilda Iita Presentation Report

Portfolio Details

- GitHub username: next-GenCoder - Repository: HildalitaPortfolio - Live portfolio: <https://next-GenCoder.github.io/HildalitaPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on project checks, workflow review, and documenting how the team keeps the project organised.

Challenge and Solution

The main challenge was linking quality work to visible portfolio evidence. The solution was a contribution-log style layout.

Learning Reflection

I improved my understanding of checks, project review, and how GitHub supports shared responsibility.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
