Contribution Area

My contribution focused on project checks, workflow review, and documenting how the team keeps the project organised.

Project Context

SiteSpy is a construction support app that keeps project records, helps with wall measurements and material estimation, and prepares information for later review.

Challenge and Solution

The main challenge was linking quality work to visible portfolio evidence. The solution was a contribution-log style layout.

Learning Reflection

I improved my understanding of checks, project review, and how GitHub supports shared responsibility.
